["Thank you very much for participating in the Indoor Climate and Health in Bellahøj (ICHB; ISB in Danish) study! We will start the interview in a little. Some questions may seem strange, but we ask to make sure that we get the right information on all homes and residents. We ask questions in the same way to all, to the extent possible. That is why we will read questions and responses aloud for you.

Everything you say will be treated confidentially and only used for research purposes. When we show the study results, you won't be able to be recognized. We will not share your personal responses with Copenhagen municipality, the housing associations (SAB, AKB, AAB, fsb) or other authorities. We can also interview you in another space, if you prefer. We will receive or retrieve information on your apartment (e.g. size, number of rooms, what type of remodeling has been done, if there has been any mold remediation or investigation of water damage before or while you have lived here, and dates for moving in or out of the apartment) from the housing associations or publicly available data, but we will not ask for personal information (e.g. about personal complaints from you or others).

Remember that even if you have said 'Yes' to participate, you can at any given time choose not to participate anymore. And you can always ask us to delete your answers, or simply not to be contacted again.

For all questions, you can answer 'Not relevant', 'I prefer not to respond', or 'Don't know', if you, for example, feel like it is too personal, don't know, or simply prefer not to respond. We naturally hope that you will respond to as many questions as possible, since this will give us a better foundation to build our study on. When we ask about your CPR number today, it is to give us better options to study more things with your data, for example, with any data on number of contacts with your general practitioner, medicine from the pharmacy, or hospitalization. This enables us to do more analyses in the future, since it can give us a better picture of the indoor climate and indoor air quality and health in Bellahøj, including back in time and in the future. If you do not want this, you can as with all other questions always choose to answer, 'I prefer not to respond'. In total, everything should take about 10-20 minutes.

Do you have any questions about what I have told you, or is there anything you would like to have repeated?

Otherwise, we can begin.

Has another adult answered some questions about the apartment, on your behalf, and may we use their responses (e.g. if they have observed mold in the apartment, and more)?☐ Yes
☐ No, I would rather answer the whole interview myself
